This is an info file for our project submission. The notebook is under the name **ACLO_project_AI.ipynb**. The prompts that were used for the notebook can be found in the file **Notebook_prompts**. A short assessment of the notebook can be found in the file **Results_notebook.pdf**

The report and the prompts for the report can both be found in the file **Prompts Logbook**. The assessment of the report can be also found at the end of the file.

The data we used for this project is the same as the onces used in the previous ACLO case. All of the data used can be found in the **Data** folder. These files are the same as we combined for the previous project. They are all of the same data files combined into larger files.

Our Github repo can also be found here:
